Phase 8:Project Demonstration

Execution & UI Evidence

Role	Name
Member	Boora Lakshmi

Terminal Execution

The following screenshot demonstrates the successful initialization of the Flask development server, indicating the application is ready to accept HTTP requests on local port 5000.

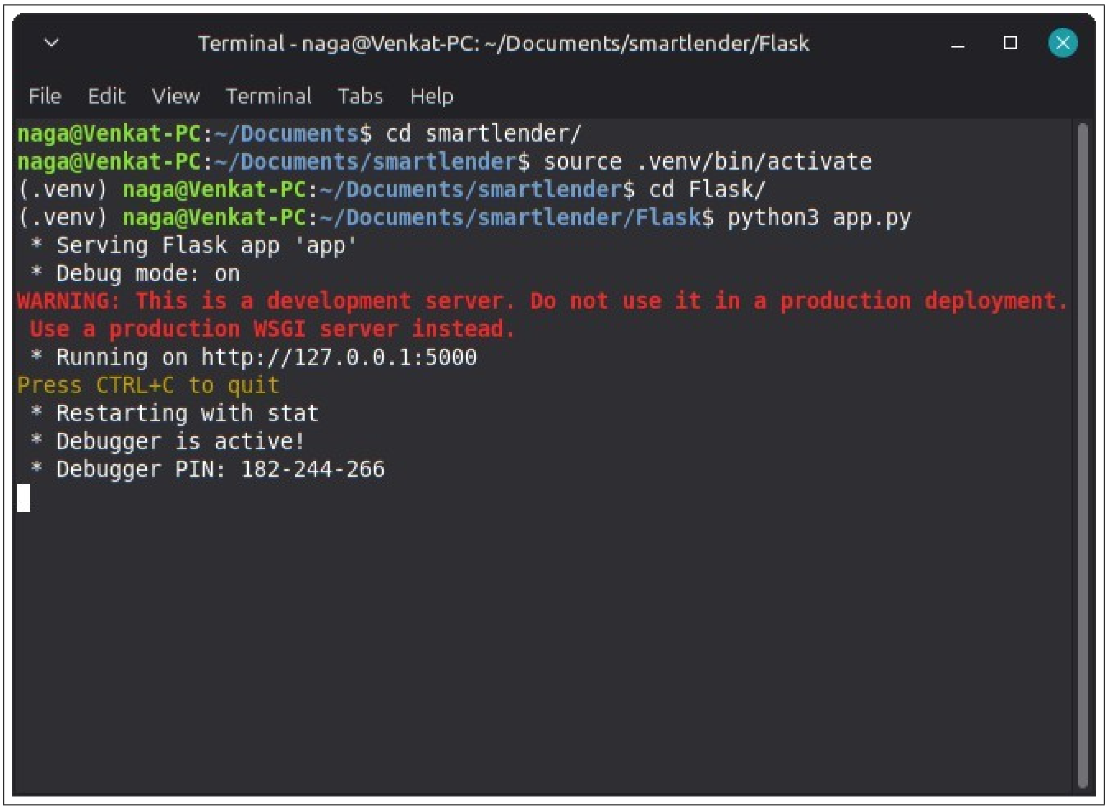

Figure 1:Flask Server Running in Terminal

Web Interface - Home Page

This screenshot displays the landing page of the SmartLender application. It outlines the project details, the technology stack utilized, and features the call-to-action button to navigate to the application form.

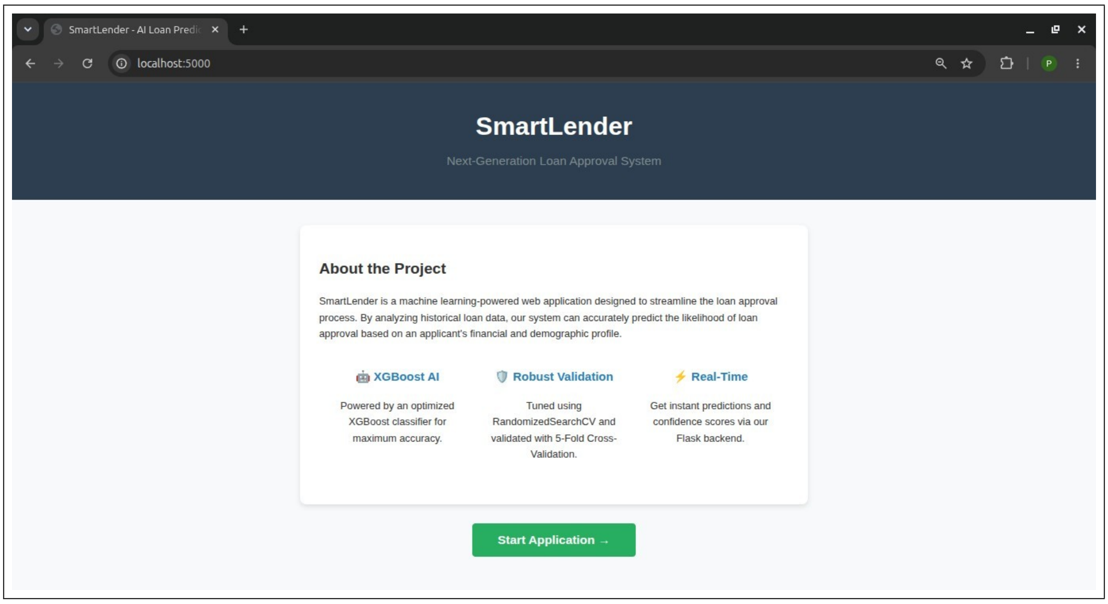

Figure 2:Landing / Home Page Interface

Web Interface - Form Input

This screenshot displays the user filling out the Loan Application Form with various demographic and financial parameters mapped to their respective integer encodings.

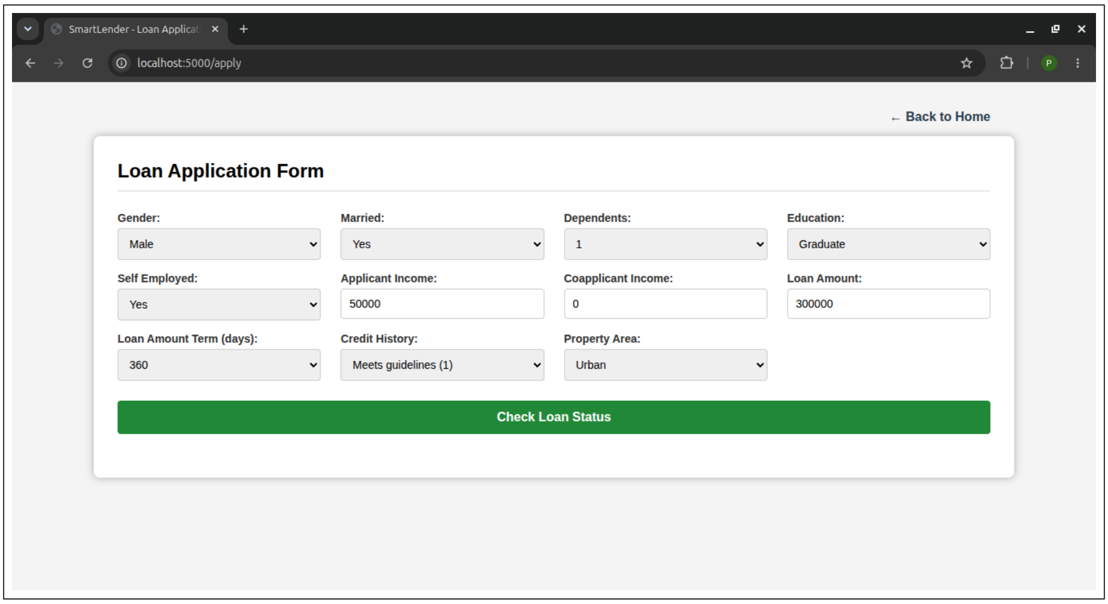

Figure 3:Input Form Interface

Web Interface - Output Result

This screenshot exhibits the system successfully processing the input and rendering th prediction result (APPROVED/REJECTED) along with the XGBoost model's confidence percentage.
